DENTATUS - A WORLD LEADER IN THE DESIGN & MANUFACTURE OF DENTAL PRODUCTS, SINCE 1930

NEW 2018 Articulators
We are proud to introduce two upgraded Dentatus articulators, ARH2 and ARL2, in a new modern design for easier usage and maintenance.
We at Dentatus are very happy that you are considering a product from our assortment. You will be purchasing a Swedish-made product of the highest quality, made by a manufacturer that has been on the Dental market since 1930. A great choice!

Many dentists have used Dentatus’ posts over the years, ever since the first pre-fabricated Dentatus post was launched in 1932. Since then the Dentatus’ posts have become a global standard in dental anchors, and offer dentists a reliable and simple solution for post and core build-up.

If you have worked as a dental technician or in the dental education system, you have no doubt worked with an articulator. Even here Dentatus was amongst the first on the market with an articulator known, then and to the present day, for its stability and precision. The Dentatus articulator range was introduced in 1944.

Together with Professor Per Axelsson, Dentatus developed the patented reciprocating Profin/EVA handpiece in 1968, for professional dental care, within periodontics and prophylaxis. Professor Axelsson started his career in the 1960s and is a former university lecturer, writer and product developer.

Dentatus has 14 years of medical studies on its Narrow Body Implant systems, which is unique in the world today. The Dentatus Implant systems, Atlas and Anew, were developed together with the New York University College of Dentistry in the USA and launched in year 2000.

Dentatus works with over 100 distribution channels globally. Our network of distributors are extremely valuable to us and wherever you are in the world, we do our best to connect you with a distributor in your country. If we have not established distribution where you are situated, there is always the possibility to make a purchase directly from Dentatus in Sweden.

Read more about the Dentatus product range on www.dentatus.com. Here you will find information in English, French, Spanish, Italian, German and Swedish and you are always welcome to contact our Sales & Marketing team via info@dentatus.se.

Sturdiness and Precise Performance

The Advantages

- Robust, precise and reliable
- New and upgraded design for easier usage and maintenance
- Ergonomic knobs and improved visibility scales
- Wide range of accessories and spare parts
- Can be used with Dentatus’ Face and Ear Bows

We are proud to introduce two upgraded Dentatus articulators, ARH2 and ARL2, in a new modern design for easier usage and maintenance.

The new upgraded models in the Dentatus articulator and face bow range keep the same high quality and precision as recognized by the profession for many years. Main improvements are found with scales and settings which have been made more ergonomical for the user.
The design of the Dentatus articulators has been made to fulfill the requirements necessary for efficient and accurate study of occlusal relations, diagnosis and treatment planning in natural and artificial dentitions. It is a high quality tool for individual reproduction of tooth and jaw relations, for analysis and extra oral manufacturing of individual prosthetics and other individual related dental devices.

The Dentatus articulators are made of aluminium and high quality stainless steel with anodized surfaces (black details) and powder coated (blue details) for sturdy and reliable use over long time. Durable plastic feet protect table surfaces from scratches.

The care with which polished or anodized surfaces, ground parts, etc. have been machined and finished is not only intended for the appearance but also to facilitate the removal of plaster, wax and other foreign matter from the articulator.

Dentatus Articulator ARL2 – Top Of The Line

Specifications:

- Adjustable Upper Jaw Member - Easily calibrated by use of the Gauge Block.
- With the Gauge Block the articulator can be adjusted and will assure correct basic settings when cooperating dentists and laboratories work with their individual ARL2 articulators.
- An articulator will in practical work be subject to gradual changes either by wear or by accident. When such changes are discovered, checking and adjustment of the articulator is important. The Gauge Block is an efficient adjunct to the ARL2 Articulator for continued precision over time.
- Adjustable Condylar Track Inclination -20° to +60°
- Full range Bennett shift 0° to 40°
- The Condylar Mechanism can be set from individual records
- Fixed intercondylar distance: 95mm
- Opens 180°+
- Condylar Track Assemblies equipped with Special Auditory Pins for attachment of the Dentatus Ear Bow AEE
- Improved thread design to minimize unintended lock-in by stone
- Solid incisal table, can be tilted anterior-posteriorly, and detachable – can be interchanged with the Fully Adjustable Segmented Incisal Table
- Total model height: 105mm
- Corrosion resistant
- Weight: 1038 g
Dentatus Articulator ARH2 – A True Companion

Specifications:
As Dentatus ARL2 articulator but without the Adjustable Upper Jaw Member and without calibration possibility with the Gauge Block
• Adjustable immediate side shift
• Weight: 1010 g

The Articulator

The articulator is defined as “a mechanical instrument that represents the temporomandibular joints (TMJs) and jaws, to which maxillary and mandibular casts may be attached to simulate some or all mandibular movements” (Academy of Denture Prosthetics 1977).

The Importance of Occlusion

Understanding the correct relations between the static and functional dental contacts is key to good clinical practice in restorative dentistry. The articulator’s primary function is to work as if it was a patient ‘in-absence’.

Made in Sweden Since 1944

The Dentatus articulators have been manufactured in Sweden since 1944 and are still well-known high-quality precision instruments designed for long time service at dental clinics, laboratories and education centers across the world. For more information, please visit Dentatus’ website www.dentatus.com
# COMPLETE ARTICULATORS

## STANDARD TYPES

### Standard Type Semi-Adjustable Articulator

**ARH2**
- 1 Solid Incisal Table (ARH-G)
- 1 Incisal Pin (ARH-22)
- 1 Orbital Indicator (ARH-K)
- 1 Long Support Pin (ARH-39)
- 2 Zinc Mounting Plates (ARH-Z)
- 2 Composite Reinforced Mounting Plates (ARH-ZC)

**ARL2**
- 1 Solid Incisal Table (ARH-G)
- 1 Incisal Pin (ARH-22)
- 1 Orbital Indicator (ARH-K)
- 1 Gauge Block (ARL-M)
- 1 Long Support Pin (ARH-39)
- 2 Zinc Mounting Plates (ARH-Z)
- 2 Composite Reinforced Mounting Plates (ARH-ZC)

## MAAXLOC

### Complete Set

**MAX**
- Mandibular Axis Locator

## ACCESSORIES

### FOR ARTICULATORS

1 pc/pkg

- **ARH-167** Incisal Pin for ARH-P
- **ARH-175** Rubber Foot
- **ARH-22** Incisal Pin for ARH-G & ARH-EF
- **ARH-34** Lock Nut for Orbital Axis Plane Indicator
- **ARH-39** Long Support Rod
- **ARH-G** Solid Incisal Table
- **ARH-K** Orbital Axis Plane Indicator
- **ARH-P** Segmented/Adjustable Incisal Table
- **ARL-M** Gauge Block (For ARL)
- **ARS-18** Allen Wrench (For ARA, ARH, ARL, ARD)
- **BDA** Telescopic Bitefork Support
- **GDA** Mounting Cradle
- **MGA** Remounting Jig
- **SLH** Wooden Carrying Case for Articulators (All Models except ARA)

### MOUNTING PLATES

Zinc or Reinforced Composite

- **ARH-Z-2** 2 Zinc Mounting Plate
- **ARH-Z-28** 28 Zinc Mounting Plate
- **ARH-ZC-2** 2 Reinforced Composite Mounting Plate
- **ARH-ZC-28** 28 Reinforced Composite Mounting Plate
FACE BOWS

FOR ALL ARTICULATOR MODELS

Facia Face Bow

AEB
1 Bitefork (AEB-G)
1 Orbital Pointer (AEB-18)
1 Clamp For Bitefork (AEB-Y)
1 Clamp For Orbital Pointer (AEB-R)
2 Standard Calibrated Condylar Rods (AEB-B)

Earpiece Face Bow

AEE
1 Bitefork (AEB-G)
1 Orbital Pointer (AEB-18)
1 Clamp for Bitefork (AEB-Y)
1 Clamp For Orbital Pointer (AEB-R)
2 Special Calibrated Condylar Rods with Blue Rounded Earpieces (AEE-E2)

ACCESSORIES

FOR FACE BOWS

AEB-18
1 Orbital Pointer
AEB-19
1 Lateral Support Rod
AEB-G
1 Bitefork (Standard)
AEB-J
1 Bitefork (Filled)
AEB-NO
2 Calibrated Condylar Rods with Extendible Pins
AEB-R
1 Locking Clamp for Orbital Pointer/or Lateral Support Rod
AEE-E2
2 Calibrated Condylar Rods with Blue Rounded Earpieces
AEB-B2
2 Calibrated Condylar Rod (standard)

SPARE PARTS & SERVICE!

A Dentatus articulator or face bow is not everlasting – but almost. There is a good possibility that your used and maybe seized Dentatus articulator can be fixed to perfect function again. We give service and exchange worn parts on several of our old models.

Contact our Spare Parts & Service department via e-mail, info@dentatus.se
DENTATUS BUSINESS POLICY

It is our policy to make every effort to genuinely satisfy our customers by providing consistently high quality products and services. Our products are designed to perform as claimed when used in the manner recommended in our technical instructions and manuals and they are intended to be used by dental professionals only.

PURCHASING

Prices

Prices are subject to change without notice. Possession of a price list does not constitute an offer to sell. All prices are in European currency, Euro (€). For sales within the EU, Swedish VAT (25%) will be added unless a valid VAT registration number is presented at ordering.

Ordering and Minimum Orders

When ordering products, please include complete catalog numbers. Orders totaling less than € 200 will be subject to a special processing charge of € 30.

Terms

Payment will be made against documents unless otherwise agreed upon. Past due balances are subject to interest according to EU regulations. Dentatus also reserves the right to renegotiate the terms and conditions in the event of repeated late payments. Delivered products remain under the property of Dentatus until complete payment has been made by the customer.

FREIGHT/SHIPPING

General

All shipments are Ex Works (EXW). Assistance with arranging freight and insurance on request can be provided.

Documents

Dentatus will cover costs for documents required to be authenticated and/or legalized by national authorizations to a certain extent. Extensive costs will be charged the customer separately.

Claims

Short claims must be made within 10 days from receipt of goods. Damaged goods must be reported to the carrier within 24 hours. Damage claim must be filled by consignee.

PRODUCTS

Product Changes

Dentatus reserves the right to make product changes without prior notice. The customer is prohibited to remove or change Dentatus’ trademarks and trade names, signs or any marks on any Dentatus product or packaging or to make any alternations in the construction or design of any product.

Warranty

Dentatus warrants its products against defective manufacturing and materials under normal procedure of use within the dental profession for a period of two years from date of purchase. Warranty claims must have proof of purchase to be valid.

Returns and Claims

Before goods are returned for credit or exchange, prior written approval including a RMA (Return to Manufacturer Authorization) number must be obtained from Dentatus.

Only standard merchandise of current manufacture and labeling and less than one year from date of original shipment will be accepted for credit. Reason for return has to be stated. Merchandise returned in the original, unopened container and accompanied by the invoice number and date of purchase will be credited at the original purchase price. However, returned “opened” merchandise or merchandise requiring repackaging will be subject to a minimum of 15% restocking charge. Return of merchandise must be prepaid. Merchandise returned without prior written approval will be returned to the customer at the customer’s expense.

Instructions for Use (IFU)

In the EU, if officially requested language at any given time is not covered by IFU, delivery may not take place until an approved translation has been prepared. A written agreement on accepted deviation has to be made.

A translation has to follow the English or Swedish original, and has to be approved by Dentatus prior to use.

Traceability

Dentatus’ products are in general labeled with LOT numbers, which allow the products to be traced in production and to customers, in case of product malfunction. The LOT number is placed on the packaging and has to be included in any return, claim or incident/accident, where the product is likely to have failed. It is required that our distributors have an integrated functional system to trace our products to the purchaser/end-user/patient, whoever is the next in the distribution chain. We also require that our distributors make this requirement to their distributors (if relevant).

Reporting Incidents and Accidents

Dentatus is conformed to the vigilance system as described in MEDDEV 2.12-1. Any malfunction of our products shall be reported to Dentatus without delay, but not later than 7 elapsed calendar days following the awareness of the event. It is important that we are informed in details on what has happened, which product(s) is (are) concerned, if there are any personal injuries or deaths involved, and a contact person for us to contact.

Limitation of Liability

Except where prohibited by law, Dentatus will not be liable for any loss or damage arising from its products, whether direct, indirect, special, incidental or consequential, regardless of the theory asserted, including warranty, contract, negligence or strict liability.

Dentatus AB, January 2018
